

Nursery Growers of Lake County Ohio

56th Annual Field Day TUESDAY, AUGUST 12, 2025

OBJECTIVE

The NGLCO is bringing together industry leaders and new partners to reimagine the future of the profession and the needs of the green community. With an emphasis on the next generation of leaders and securing the green industry in Ohio, we are inviting students and vocational schools to come and learn more about their futures in our industry.

Nurserymen from Lake County have long been known for new plant introductions and growing a wide variety of well-known woody ornamentals. This fact coupled with being strategically close to major shipping and marketing facilities, along with excellent climate and soil conditions, has earned Lake County a reputation that is second to none.
